The document text is as follows:

This clinic was specifically created to aid the newly formed family courts in their adjudication of wayward youth. Eventually all 50 states adopted these special courts to handle juvenile delinquency outside of the adult criminal courts. The goal of these courts was to help the youth return to a healthy path of development. Hence, there was no sentencing, only adjudication of the youth for their betterment. Until In re Gault, children and adolescents in family court had few of the safeguards afforded to adults charged with crimes. They now have all of legal rights except for a jury of their peers. Recognizing the developmental aspect of juveniles as distinct from adults, the first juvenile justice system was established in 1899 in Illinois and which then led to the creation of the first child and adolescent psychiatry clinic in 1909, in Chicago (May, Osmond, & Billick, 2014)
